

Specification Sheet

- Supra FS 04 Scart cable 1m
- Tin-plated multi core low capacitance OFC cable
- RGB wired
- Scart to Scart
- 1m length

Supra have produced their own fully-wired scart to scart cables. These are designed to be used between devices such as DVD, VCR and Set-Top boxes going to TV's, plasma screens and other displays featuring Euro scart sockets.

Fully-wired scart cables are competitively priced and offer high quality audio and video signal carrying properties, with minimal losses

Features a higher exit angle (45 degrees) for the cable, thereby allowing scart cables to be used in closer proximity to each other (useful if the equipment features several scart sockets right next to each other)

The FS Scart is **★★★★★** product (Sept 2004).
